High Tech Plagiarism Detection : CSI

2Learn Canada Plagiarism Sleuth
http://www.2learn.ca/mapset/SafetyNet/plagiarism/sleuth/StringSearchnew.html
Uses several search engines to search your online inserted phrase. Search engines are chosen for good phrase searching.

$ Online, free resource

The Plagiarism Resource Center at the University of Virginia
http://plagiarism.phys.virginia.edu/
The Plagiarism Resource Center at The University of Virginia Physics professor Lou Bloomfield creates and distributes for free Wcopyfind. The software allows professors and departments to create a database of student work, which allows for comparing documents to each other.

$ Free download and open source software

Eve2.2
http://www.canexus.com/eve/index.shtml
Searches the Internet for signs of plagiarism in papers. There's a free trial copy of EVE that can be downloaded and used for 15 days. Search engine for the web.

$$ 399.00 approximate cost for a university wide program.

Glatt Plagiarism Services
http://www.plagiarism.com/
Offers different services, including a tutorial program to teach students about plagiarism, a screening program to detect plagiarism, and a self-detection program to catch unintentional occurrences of plagiarism (free). The screening program works by eliminating every fifth word of the suspected student's paper. The student is then asked to supply the missing words.

$500 for Teaching program + Screening Program (individual use); licensing also available

Turn It In
http://www.turnitin.com
Online system. Searches "gated web" as well as free web content. Also checks against papers already "turned in" through TurnItIn. Both students and faculty must learn software. Draft mode for teaching plagiarism. Student work stored in proprietary database. Works with Blackboard and WebCT for additional fee, for grading and roster import.

$$$ ~ 80 cents per student in addition to flat fee, licensing cost by FTE count
