

# How to Record a Podcast to an SD card using the Zoom LiveTrak L-8 Mixer

Record each individual microphone plus a “master” copy of all inputs together

## Record

1. Press RECORDER button in bottom right corner

2. Check that button below OVERDUB is NOT lit  
*(this will create a new project each time you press record)*

3. Press the REC/PLAY button for each mic that you want to record *(should light up red)*. Also press the REC/PLAY button for the Master to save a recording of all inputs together

4. Press the small, red ● button in the bottom right first to place on standby

5. Then press the green ► button next to it to start recording

6. Press the yellow ■ button to stop recording  
*(Note: to pause recording, press the green ► button. Press again to un-pause. Must be un-paused in order to fully stop recording.)*

## Playback

1. Press RECORDER button in bottom right

2. Press the REC/PLAY button for each channel (mic) that you want to play back *(should light up green; you may need to press twice)*

3. Press the rewind button to skip to the beginning of recording

4. Press the small, green ► button on the bottom right to start playback *(note: pressing the green ► button a 2<sup>nd</sup> time will cause it to blink, meaning it's paused)*

5. Press the yellow ■ button to stop playback
